Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: examiner indicated that although the method to correct errors utilizing the disclosed ecc coding method was not itself disclosed, it may be considered enabled if the disclosed coding method is itself considered sufficiently analogous to those generally known in the prior art that its use to correct errors may likely be correspondingly derived by one of ordinary skill without undue experimentation in view of the prior art although the specific encoding method disclosed is not itself explicitly taught by the art of record; and further although the art of record explicitly discloses a method/apparatus by which an ecc may be utilized to detect correctable errors in parallel to a data copy operation, as it's disclosed as being an intended improvement to an alternative implicit in-line method (as disclosed by the applicant) to reduce latency, both are considered taught by the art of record .
